

Papelão Ondulado O papelão ondulado é a estrutura formada por um ou mais elementos ondulados (miolos) unidos a um ou mais elementos planos (capas) através de colagem a quente com aplicação nos topos das ondas. Ele pode ser composto através das várias combinações de papéis tipo capa e miolo e definido em função dos testes físicos e do desempenho da embalagem que se deseja obter.

É comum o usuário relacionar a tonalidade do papel com a sua qualidade porém as diferentes tonalidades estão relacionadas aos diferentes tipos de matéria-prima e/ou processos de fabricação.

De acordo com a terminologia da NBR 5985, os principais tipos de papelão ondulado são:

Face Simples

Espessura de 2,7mm (+/- 10%) Estrutura formada por um elemento ondulado (miolo) colado a um elemento plano (capa) geralmente fornecido em forma de bobinas.

ONDA E - (Micro Ondulado)
